EDUCATION

2022 - 2025

University of the Witwatersrand
Bsc. Eng (Civil)

2020

Tswelelopele High School
Matric

CERTIFICATIONS

ECSA Candidate Engineer (Civil)
Reg. No: 20262010815

Udemy AutoCAD
Autodesk Certified Professional

HOBBIES

- Competitive E-sports (Fifa/FC)
- Drawing (freehand)
- Soccer

LANGUAGES

- English
- SeTswana
- IsiZulu

PROFILE

Civil Engineering graduate from the University of the Witwatersrand currently working as a Civil Engineer at OAR Consultants. Registered as an ECSA Candidate Engineer. Practical experience in transport planning, road design, and traffic engineering, supported by strong academic projects in geotechnical, structural and concrete engineering. I am passionate about contributing to impactful infrastructure projects and developing practical, sustainable engineering solutions in multidisciplinary teams. I am eager to grow within a global consulting environment and contribute to complex projects across South Africa and internationally.

EMPLOYMENT RECORD

OAR Consultants (*formerly Koleko Solutions*)

Civil Engineer

July 2026 - Present

- Delivered transport planning and traffic engineering projects, including TIAs, Transport Master Plans, Road Design, Programme Management, parking studies, and road closure assessments.
- Conducted site investigations, traffic surveys and engineering analyses, interpreting traffic data using Traffix.
- Prepared engineering drawings, layouts and spatial analyses using AutoCAD and ArcGIS/QGIS.
- Produced technical reports, client proposals, tender submissions, and developed Excel VBA macros to automate office workflows.

Civil Engineering Intern

Feb 2026 - July 2026

- Supporting transport planning and traffic engineering projects, including TIAs, Masterplans, parking studies, road closures, and integrated transport planning (BRT).

University of the Witwatersrand

Vacation Work

Jul - Oct 2025

- Collaborated with the Head of School to extend and optimise a rainwater harvesting system. Assisted with system design improvements, performance monitoring, and operation of remote water monitoring which included CR-Basic programming.

Geotechnical Lab Assistant

Aug - Sep 2025

- Supported a master's research project focused on pavement design for heavy-duty mine trucks. Conducted soil and material testing (CBR, UCS, etc), and contributed to developing a pavement system for high-performance environments.

PROJECTS

OAR Consultants

Mandlakazi Road Design (Zululand Municipality, KZN)

Supported the design of a construction road for a water reservoir and pump station on a steep terrain (approximately 30° slopes).

Assisted with:

- Horizontal and vertical alignment design on Civil3D, with a focus on minimizing cut and fill and gradient optimisation along the pipeline.
- Supporting the detailing and layout development, producing technical drawings in AutoCAD, report writing and site visits.

Protea Glen Transport Master Plan (Gauteng)

Contributed to the development of a Transport Master Plan identifying short, medium, and long-term transport interventions and implementation phasing.

Key responsibilities included:

- Infrastructure upgrade planning and transport solutions
- Preparation of the Status Quo Report
- Traffic capacity analysis and modelling of existing and future developments (Traffix)
- Mapping and layout preparation using ArcGIS and AutoCAD.

School for the Deaf and Blind – TIA & Masterplan (Mpumalanga)

Conducted a Traffic Impact Assessment (TIA) to ensure safe and inclusive access for learners with special needs. The study emphasised pedestrian pathway upgrades, traffic calming measures, and transport solutions. Supported the development phasing, cost optimisation for each phase, and identification of infrastructure upgrades required to support future growth.

Tshivhulani Mall TIA (Limpopo, South Africa)

Assessed the traffic impacts of a proposed retail mall development, including parking supply, vehicle ingress and egress, and non-motorised transport access. Developed a traffic model to simulate peak-hour conditions and proposed mitigation measures for key intersections.

University of Witwatersrand

Final Year Project – Tailings Storage Facility

Designed an upstream TSF to store gold tailings. Developed TSF geometry and staged raises using Civil 3D, and designed layouts in AutoCAD. Conducted seepage and slope stability analyses using RocScience Slide2..

Transportation Engineering – Road Alignment Design

Designed a road alignment using Civil 3D in compliance with SANRAL design guidelines, prepared layouts using AutoCAD.

Reinforced Concrete Design – Multi-Storey Building

Designed a multi-storey building using PROKON and AutoCAD in accordance with SANS design codes. Completed load calculations, beam and column design, slab design and reinforcement detailing.

TECHNICAL SKILLS

- Autodesk AutoCAD
- Autodesk Civil 3D
- ArcGIS, Google Earth
- Traffix
- Microsoft Excel (including VBA Macro Programming)
- Microsoft Word, PowerPoint
- TMH & TRH Manuals
- Technical Report Writing

OTHER

- Prokon
- RocScience Slide2
- GeoStudio
- HEC-RAS
- EPANET
- MATLAB
- Python
- Knowledge of Relevant SANS Design Codes

SOFT SKILLS

- Fast Learner
- Ability to Work in a Team
- Adaptability
- Accountability
- Interpersonal Skills
- Versatility

ACHIEVEMENTS & LEADERSHIP

- Captain of the Wits Esports Team (2025)
- Knockando Certificate of Excellence (2022)
- Awarded Certificates of Distinction in Engineering Physics, Engineering Mathematics, and Ethics (2022)
- Achieved 1st Place in the Wits Esports FC League (2024 & 2025)
- Qualified to represent Wits University at the USSA E-Sports Competition (2024 & 2025)
